LTE Cat 4

Product Description

The Telit Cinterion® PLS83-W provides high-speed global IoT connectivity delivering 18 Band LTE Cat.4 with 2G/3G fallback for seamless coverage across a wide variety of different wireless networks. When global connectivity is not required, a suite of variants deliver targeted regional connectivity for North America, Europe and Asia Pacific, Latin America, India and Japan. Offering IoT optimized speeds of 150Mbit/s download and 50Mbit/s uplink, the PLS83 IoT module is ideal for industrial IoT applications such as transportation and industrial automation and gateways. All of these applications require high bandwidth plus the longevity and stability of LTE networks along with continuous coverage in regions where a 4G connection is not present.

Key Benefits

The Telit Cinterion PLS83-W LTE Cat.4 IoT module delivers a combination 18 Band FDD and TDD LTE Cat.4, Eight Band 3G UMTS/WCDMA and Quad-Band GSM. This provides seamless global coverage from a single product SKU; however, regional variants provide more targeted coverage. The feature-packed device includes a comprehensive AT command set for simplified device control along with IP connectivity, voice over LTE (VoLTE) and circuit-switched voice. Integrated GNSS support (GPS/BeiDou/Galileo/GLONASS) provides precise positioning and timing data which is essential for global track and trace applications. Optional embedded eSIM technology strengthens security, reduces design complexity and simplifies manufacturing and logistics. What's more, optional embedded processing further streamlines design and development while strengthening processing capabilities and optimizing the total cost of ownership. Advanced security features including a secure boot, secure storage and key lifecycle management protect data and devices. Offered in the Telit Cinterion Industrial Plus form factor, the PLS83 series offers footprint compatibility with Telit Cinterion IoT modules ranging from 2G to ultra-high-speed LTE. In particular, the highly efficient Telit Cinterion PLS63 LTE Cat.1 series offers seamless software and hardware compatibility for all variants with the Telit Cinterion PLS83 LTE Cat.4 IoT module. Footprint and software compatibility greatly improves deployment agility and simplifies migration between technologies. Additionally, all Telit Cinterion modules come with Full Type and carrier approvals plus expert technical support to help speed time to market

Seamless integration with TC IoT Suite ensures long life solutions

The PLS83-W is supported by the Telit Cinterion IoT Suite, an optional lifecycle management platform that optimizes connectivity and manages the security and lifespan of IoT solutions to ensure continuity and longevity.

Optional eSIM simplifies and secures IoT connectivity

An optional embedded SIM strengthens security, authenticates devices, encrypts data and securely manages connections to cellular networks. It works seamlessly with subscription management solution to maintain connectivity for the lifecycle of devices. All this simplifies integration, manufacturing and logistics and helps to lower Total Cost of Ownership.

Regional variants meet all connectivity needs

When global connectivity is not required, regional variants provide targeted coverage:
